NUSENSUELLE

ALLUVION

TORRENT MOTOR

ELEVATE YOUR VIBE

THE WAND THAT ECLIPSES ALL INDUSTRY STANDARDS.

WHILE TRADITIONAL WANDS only feature a single motor located in the toy's head, the Alluvion is dual-ended— each end packing 12 deep, rumbly vibration speeds. The toy's handle, equipped with the new 60SX AMP motor, produces a thumping gyration that is powerful enough to make users feel as though they are vibrating from the inside out. While the handle's power was engineered for optimal arousal, it was also designed to be ultra-flexible. Users can enjoy effortless insertion, as the handle can contort to conform to all body shapes and sizes. While this tapered end is perfect for g-spot stimulation, the TORRENT MOTOR located in the wand's head produces a deeper vibration, making it the prime candidate for clitoral stimulation.

THE ALLUVION is just as powerful as it is versatile. True power users who are up for the challenge can take advantage of the wand's XLR8 turbo boost feature, which increases the vibration intensity to the most powerful setting for 12 seconds. Available in deep black with rose gold and purple with rose gold, embrace the new and adventurous with the Alluvion Wand.

- **TORRENT MOTOR IN THE HEAD AND 60SX AMP IN THE HANDLE**
- **12 SPEEDS PER END**
- **100% BODY-SAFE SILICONE**
